# Antitrust Admonition

**Texas Reliability Entity, Inc. (Texas RE) strictly prohibits persons participating in Texas RE activities from using their participation as a forum for engaging in practices or communications that violate antitrust laws. Texas RE has approved antitrust guidelines available on its website. If you believe that antitrust laws have been violated at a Texas RE meeting, or if you have any questions about the antitrust guidelines, please contact the Texas RE General Counsel.**

**Notice of this meeting was posted on the Texas RE website and this meeting is being held in public. Participants should keep in mind that the listening audience may include members of the press, representatives from various governmental authorities, and industry stakeholders.**

# Agenda

R2

Attachment  
1

What's  
Next?

# CIP-003-8 R2

## R2

Each Responsible Entity with at least one asset identified in CIP-002 containing low impact BES Cyber Systems shall implement one or more documented cyber security plan(s) for its low impact BES Cyber Systems that include the sections in Attachment 1

R2

Attachment 1

Attachment 2

# Cyber Security Plans

## Section 1

Cyber  
Security  
Awareness

## Section 2

Physical  
Security  
Controls

## Section 3

Electronic  
Access  
Controls

## Section 4

Cyber  
Security  
Incident  
Response

## Section 5

Malicious  
Code  
Mitigation

# Section 1 – Cyber Security Awareness

Reinforce every 15  
calendar months

Different ways to  
raise awareness

## Section 1 – Cyber Security Awareness

# Best Practices

Direct communication

Indirect communication

Management support

## Section 2 – Physical Security Controls

# Control Physical Access

Asset or locations of Bulk Electric System (BES) Cyber Systems (BCSs)

Electronic Access Controls Cyber Assets

## Section 2 – Physical Security Controls

## Section 3 – Electronic Access Controls

### 3.1 Permit only necessary inbound and outbound electronic access

- Between a low impact BCS and Cyber Asset
- Using a routable protocol when entering or leaving
- Not used for time-sensitive protection or control functions between intelligent electronic devices

### 3.2 Authenticate all dial-up connectivity

## Section 3 – Electronic Access Controls

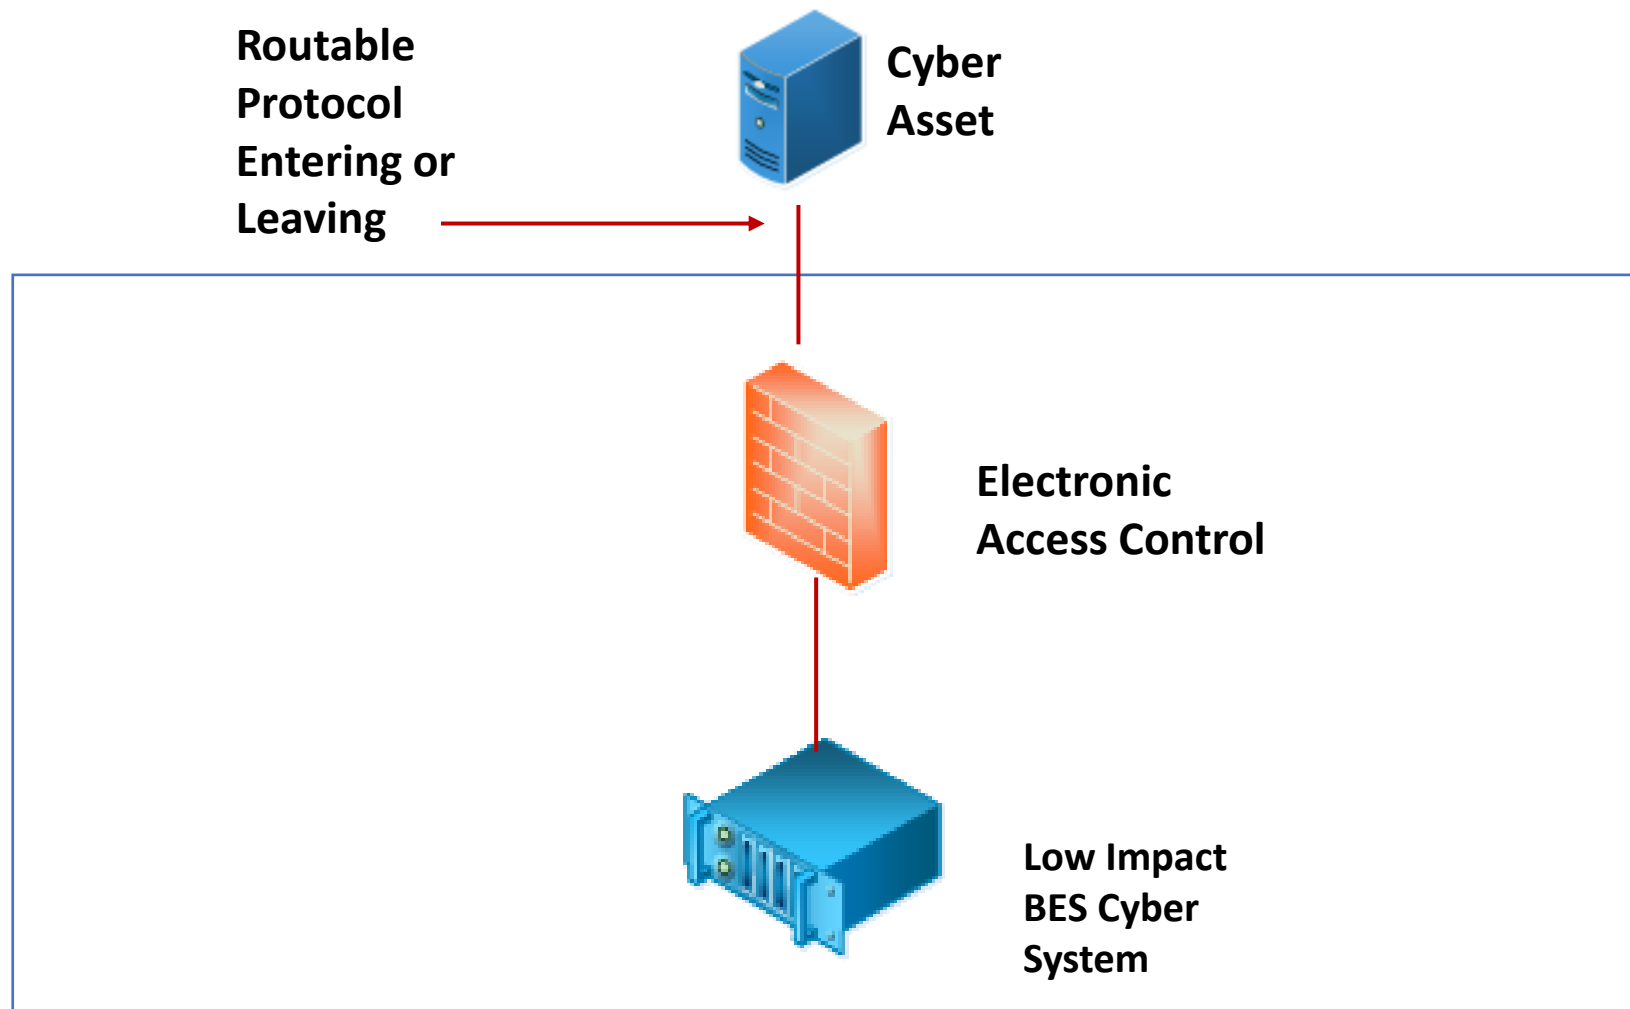

Permit only what  
is truly  
necessary

Review  
Electronic Access  
Controls lists

## Section 3 – Electronic Access Controls

## Section 4 – Cyber Security Incident Response

**Identify, Classify, and  
Respond**

**Determination of  
Reportable Cyber  
Security Incident and  
Notification**

**Testing &  
Maintenance**

## Section 4 – Cyber Security Incident Response

# Test on Reportable Cyber Security Incident

Reportable Cyber  
Security:  
NERC-defined  
term

Test on applicable  
systems

## Section 4 – Cyber Security Incident Response

# Test Frequently

Simulate  
real-life  
Cyber  
Security  
Incidents

Participate  
at Grid  
Security  
Exercise  
(GridEx)

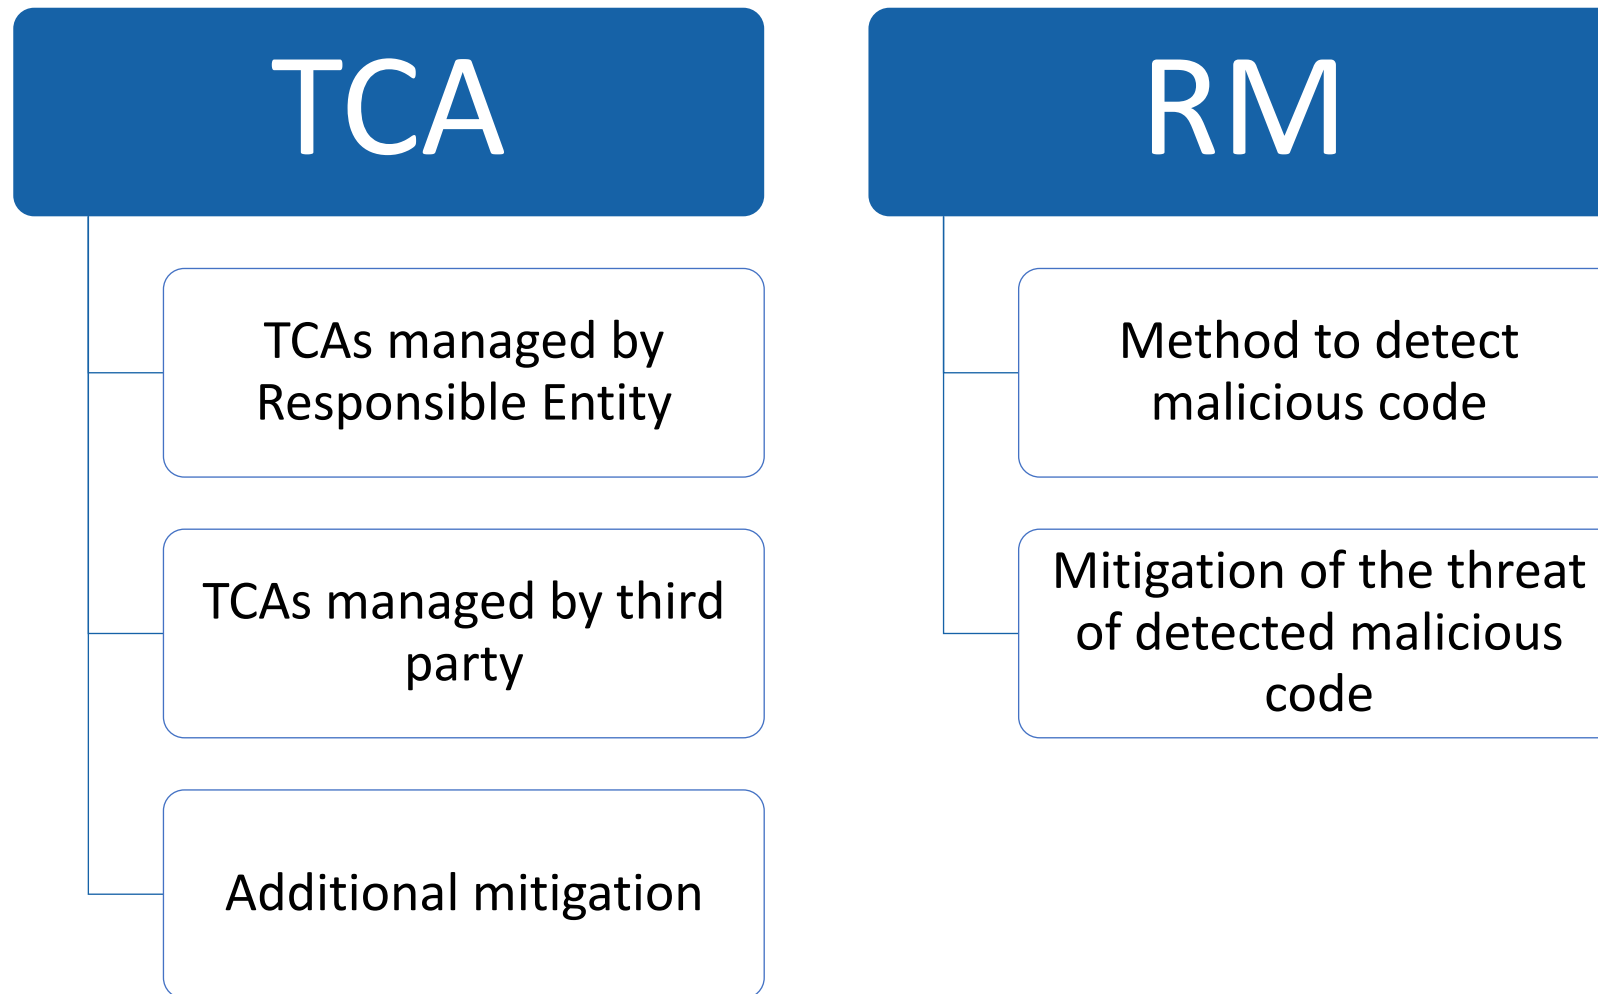

Involve  
local, state,  
and federal  
government

Incorporate  
lessons  
learned

Stress the  
plan

## Section 5 – Transient Cyber Asset (TCA) and Removable Media (RM) Malicious Code Risk Mitigation

## Section 5 – Transient Cyber Asset (TCA)

**TCA Managed by Entity**

**Ongoing or On-demand**

Antivirus software

Application  
whitelisting

Other method(s)

## Section 5 – Transient Cyber Asset (TCA)

TCA NOT Managed by Entity

Prior to Connecting

Antivirus update level and process	Application whitelisting	Operating system and software executable only from read-only media	System hardening	Other method(s)	Mitigation actions
------------------------------------	--------------------------	--	------------------	-----------------	--------------------

## Section 5 – Removable Media (RM)

# Removable Media

Method(s) to  
detect malicious  
code

Mitigation of the  
threat of detected  
malicious code

# CIP-003-8 R2 Attachment 2

**Section 2. Physical Security Controls:** Examples of evidence for Section 2 may include, but are not limited to:

- Documentation of the selected access control(s) (e.g., card key, locks, perimeter controls), monitoring controls (e.g., alarm systems, human observation), or other operational, procedural, or technical physical security controls that control physical access to both:
  - a. The asset, if any, or the locations of the low impact BES Cyber Systems within the asset; and
  - b. The Cyber Asset(s) specified by the Responsible Entity that provide(s) electronic access controls implemented for Attachment 1, Section 3.1, if any.

# What's Next?

## CIP-003-9

- Vendor Electronic Remote Access Security Controls
- April 1, 2026

# Section 6 – Vendor Electronic Remote Access Security Controls

## 3.1 - Electronic Access Controls

**Routable  
Protocol:  
Entering or  
Leaving**

**Section 6. Vendor Electronic Remote Access Security Controls:** For assets containing low impact BES Cyber System(s) identified pursuant to CIP-002, that allow vendor electronic remote access, the Responsible Entity shall implement a process to mitigate risks associated with vendor electronic remote access, where such access has been established under Section 3.1. These processes shall include:

- 6.1 One or more method(s) for determining vendor electronic remote access;
- 6.2 One or more method(s) for disabling vendor electronic remote access; and
- 6.3 One or more method(s) for detecting known or suspected inbound and outbound malicious communications for vendor electronic remote access.

The background of the slide features a blurred image of the Texas state flag on the left and a close-up of a wind turbine's hub and blades on the right. The blades are white with red tips. A dark blue rounded rectangle is centered over the image.

# Questions?

**TEXAS RE**

Ensuring electric reliability for Texans
